HIPAA Compliant

HIPAA Compliant and 100% Secure is our commitment to you! Each and every protocol is authenticated to verify the identity of anyone accessing all client information. All activity is audited to ensure network security and encryption. Redundant firewalls and a myriad of cutting-edge security software ensure your sensitive client information and all activity is protected. We maintain formal data backup and extensive diagnostic solutions to guarantee 100% security and reliability at all times.

Home Hotline

...Keeps your real estate customers and potential buyers in touch with you and provides listing information to them 24 hours a day.

Designed for the real estate agent on the move, Hello Phoenix Home Hotline™ gives you a professional edge by allowing callers to reach you at any three telephones of your choice. An auto attendant (or your own personal greeting) will answer the call and provide touchtone options for reaching you at the office, on your cell phone, at your home office, etc. Hello Phoenix will forward the call to anywhere you choose. Voicemail is included with this plan.

Home Hotline™ listings replace information flyer boxes with recorded information on your home listings. These recordings are available 24 hours a day by calling only one phone number. At the end of the listing message, the listener can choose to be immediately connected to an agent or lender.

This program offers the following available features

✔ Voicemail with notification

Listen to and store your voicemail any time via phone, e-mail, or online. With voicemail you can press "0" during the message and be connected with the caller without having to search for the number. You can also receive notifications of new voicemail through email or mobile device messages.

✔ Fax Forwarding

Forward fax calls to a fax machine of your choice. You are notified through email or mobile device when you receive a fax transmission.

✔ Fax to Email

Have your faxes sent directly to your email address. You can then choose which pages to print, and the fax document can be saved on your computer. You are notified through email or mobile device when you receive a fax transmission.

✔ Ad Response Tracking

Obtain call reports and track which advertising methods were most effective.

✔ Schedules

Adjust your call routing based on time of day and day of week. Lets you decide when any of your extensions ring. You control the schedule with an online setup. Make changes to your schedule at any time.

✔ Long Distance Call Forwarding

You can program your Hello Phoenix number to ring to any long distance number. Your customers can reach you by dialing a local number and never know you aren't in town.

✔ Toll Free Number

You can have a toll-free Hello Phoenix number with the same convenient features.
